

Vacancy (calling applications) for an MPhil student
Institute for Combinatorial Advanced Research & Education (KDU-CARE)
General Sir John Kotelawala Defence University (KDU), Ratmalana

Applications are called from prospective candidates for an MPhil degree in Chemistry. The research project is on developing a porous material for water filtration applications. A stipend will be paid for a period of 2 years.

Candidate requirements:

- The candidate is expected to have a B.Sc. chemistry special degree with a First class, Second upper or Second lower division from a recognized university.
- Should be extremely self-motivated and have a strong interest to conduct wet lab research.
- Should be innovative and be able to work under stress.
- Should be a very good team player and have a good oral and written communication skills in English.
- Should be able to work in different locations (KDU, Uwa Wellassa University and Rajarata University) as per the project requirements.

How to send your applications:

Please Email the following to kdumphil@yahoo.com on or before **27th January 2023**.

- Personal statement explaining your suitability for this MPhil project and why we should hire you?
- Detailed curriculum vitae (CV)
- Name and email contacts of TWO references to obtain recommendation letters if necessary.

ONLY the duly completed (personal statement, CV and details of references) applications will be processed. Short-listed candidates will be called for an interview.
